

To FCC:I am a subscriber to XM radio. I live on a remote ranch in NE Oregon. I only receive one radio station, that is until I subscribed to XM radio. XM radio is very important to me in that I am able to receive weather reports, news, and can enjoy music I would otherwise not be able to hear. I very much appreciate being able to receive this information not only at my house but in my car.

I believe it is my right to hear the radio content I choose and it should not be limited. I respectfully ask you to reject the NAB's petition 04-160 and support the right of XM Radio to provide the kind of programming I need and have a right to.

Thank you

Gail Hammack
